# آشنایی با پایگاه اطلاعاتی

## ناهید ضیائی

کارشناس کتابداری و اطلاع رسانی پزشکی

## میرا ابرقوئیان

کارشناس ارشد علم اطلاعات و دانش شناسی

کمیته آموزش شورای سیاستگذاری کتابخانه ها

بهار ۱۳۹۵

- ▶ پایگاه Clinical Key ، مجموعه‌ای از محصولات انتشارات Elsevier می‌باشد.
- ▶ یک موتور جستجوی بالینی و یک پایگاه اطلاعاتی قدرتمند که جامعیت ، مورد اطمینان بودن و سرعت در بازیابی اطلاعات و پاسخگویی از مزیتهای آن محسوب می‌شود.
- ▶ مجموعه‌ای است از مجلات ، کتاب ، راهنمایها ، اطلاعات دارویی ، تصاویر ، ویدیوهای پزشکی و جراحی و شواهد بالینی مورد نیاز پزشکان ، پیرا پزشکان ، دانشجویان و بیماران

- Elsevier produce about 25% clinical information resources
- Clinical Key and UTD complete each other
- Clinical key is one of EBM resources:
  - Best research evidence
  - Clinical expertise
  - Patient preferences

بیش از ۵۰۰ عنوان مجله پزشکی و جراحی از انتشارات **Elsevier**

بیش از ۱۱۰۰ عنوان کتب مرجع پزشکی و جراحی

مجموع کامل ۵۷ عنوان مجله از مجلات **Clinics of north America**

آموزش بیش از ۳۵۰ تکنیک جراحی و ۴۵۰ عنوان شرح عمل جراحی

مقالات بالینی و شرح بیماریهای مبتنی بر شواهد بیش از ۷۵۰ بیماری

دسترسی به بیش از ۱۵۰۰۰ راهنمای آموزش بیمار

حدود ۱۳۰۰۰ ویدیو پزشکی

حدود ۵۰۰۰۰۰ تصویر پزشکی

بیش از ۴۰۰۰ راهنمای عملی بالینی

اطلاعات بیش از ۲۹۰۰ دارو که توسط شرکت **Gold standard** فراهم شده و به روزرسانی می شود.

۲۰ میلیون خلاصه مقاله مدلاین که به صورت روزانه از کتابخانه ملی پزشکی به این مجموعه اضافه می گردد.

برای استفاده بهتر از امکانات این پایگاه مانند ذخیره و بازیابی نتایج جستجو در مراجعات بعدی، ثبت نام (Register) کنید. پس از انجام ثبت نام، از گزینه Login برای وارد شدن به پایگاه استفاده نمایید.

The image shows a screenshot of the ClinicalKey website (https://www.clinicalkey.com/#/). The top navigation bar includes links for English, CME, Login, and Register. The Register link is circled in red with a red arrow pointing to it from the top right. The main content area features the ClinicalKey logo and the tagline "Lead with answers." Below the logo is a search bar with "All Types" and a dropdown menu, and a magnifying glass icon. To the right of the search bar are links for "Or Browse: Books, Journals, More". A "Featured Content: Zika Virus" section is visible. At the bottom, there are social media links (f, in, tw, Gr) and Elsevier branding. The footer contains links for Contact Us, Resource Center, Terms & Conditions, Privacy Policy, Registered User Agreement, and Help. It also includes copyright information (Copyright © 2016 Elsevier, Inc. All rights reserved.) and a note about Cookies. The RELX Group logo is in the bottom right corner.

# Infections in the Elderly

Kent B. Crossley and Phillip K. Peterson

Mandell, Douglas, and Bennett's Principles and Practice of Infectious Diseases, 315, 3459-3465.e3

دسترسی به  
متن کامل

## Keywords

bacteremia, decubitus, elderly, enterohemorrhagic *Escherichia coli*, herpes zoster, influenza, pneumonia, tuberculosis, urinary tract infection, West Nile virus

## Short View Summary

### GENERAL CONSIDERATIONS

- People living past 65 years of age are rapidly increasing in number.
- Individuals older than age 65 years have a higher incidence of most infections than do younger people.
- For nearly all infections, clinical manifestations are more subtle in the elderly.

### URINARY TRACT INFECTION

- Asymptomatic bacteriuria should not be treated.
- Symptomatic infection is often caused by organisms other than *Escherichia coli*.
- Extended-duration therapy (i.e., >7 days) of symptomatic infection is not needed in either men or women.

## Regulatory development of geriatric medicines: To GIP or not to GIP? rss print

Bart De Spiegeleer, Evelien Wynendaele, Nathalie Bracke, Lieselotte Verlyser, Lien Taevernier, Agnes Degroote and Sofie Stalmans

Ageing Research Reviews, 2016-05-01, Volume 27, Pages 23-36, Copyright © 2016 Elsevier B.V.

### Graphical abstract

### Highlights

- There is lack of knowledge on the benefit/risk ratio of medicines in the elderly.
- Current regulatory status on the development of geriatric medicines is poor.
- The different stakeholders should be involved.

## Abstract

with rare missense alleles in genes other than CFI. Genotyping in 5,115 independent samples confirmed associations with AMD of an allele in C3 encoding p.Lys155Gln (replication  $P = 3.5 \times 10(-5)$ , OR = 2.8; joint  $P = 5.2 \times 10(-9)$ , OR = 3.8) and an allele in C9 encoding p.Pro167Ser (replication  $P = 2.4 \times 10(-5)$ , OR = 2.2; joint  $P = 6.5 \times 10(-7)$ , OR = 2.2). Finally, we show that the allele of C3 encoding Gln155 results in resistance to proteolytic inactivation by CFH and CFI. These results implicate loss of C3 protein regulation and excessive alternative complement activation in AMD pathogenesis, thus informing both the direction of effect and mechanistic underpinnings of this disorder.

Drug Information Provided By Gold Standard

**Description:** Acetaminophen (APAP, paracetamol) is a para-aminophenol analgesic and the active metabolite of phenacetin. Due to the toxic effects of phenacetin at therapeutic doses and the availability of acetaminophen, phenacetin is no longer used. Acetaminophen possesses analgesic and antipyretic activity similar to aspirin; however, acetaminophen has no peripheral antiinflammatory activity or effects on platelet function. Acetaminophen was first used in clinical medicine in the 1890's. It is effective in the relief of both acute and chronic pain and may be preferred over NSAIDs due to fewer hematologic, GI, and renal effects. Acetaminophen is the preferred analgesic/antipyretic for patients in whom aspirin is contraindicated and in those with underlying renal disease for episodic, though not chronic, use.<sup>23977</sup> In addition, acetaminophen has been recommended by the American Lung Association as the first line treatment for aches and pains associated with the flu, by the American Geriatrics Society for both minor and persistent pain in elderly patients<sup>35814</sup>, and by the American College of Rheumatology as first-line therapy for osteoarthritis of the hip or knee<sup>35976</sup>. The drug has a history of safe and effective use; however, unintentional or intentional misuse of acetaminophen is the number one cause of acute hepatic failure in the U.S.<sup>32202</sup> Acetaminophen was first approved by the FDA in 1950. Intravenous acetaminophen (Ofirmev) was approved by the FDA in November 2010 for the treatment of pain and fever in adults, adolescents, and children over the age of 2 years.<sup>42289</sup>

**Mechanism of Action:** The exact mechanism of action is unknown, but acetaminophen is thought to mediate its actions centrally through activation of the descending serotonergic pathways. Acetaminophen is believed to increase the pain threshold by inhibiting prostaglandin (PG) synthesis through the

Migraine Headache

Disease Overview View Full Topic

Fern's Clinical Advisor 2016 · Fern, Fred F., M.D., F.A.C.P.

Definition

Migraine headaches are recurrent headaches that are either preceded by a focal neurologic symptom (migraine with aura), occur independently without preceding focal neurologic symptoms (migraine without aura), or have atypical presentations (migraine variants). The migraine aura typically is characterized by visual or sensory symptoms that develop over 5 to 60 min. If aura includes motor weakness, the migraine is referred to as hemiplegic. In migraine with and without aura, the headache is typically unilateral, pulsatile, and associated with nausea and vomiting, photophobia, and phonophobia. Migraines that occur ≥15 days every month for ≥3 months are known as chronic; otherwise, they are referred to as episodic.

## IMAGE

## Asthma across the ages: Knowledge gaps in childhood asthma

Journal of Allergy and Clinical Immunology, The.

Szeffler, Stanley J., MD; Chmiel, James F., MD, MPH... [Show all..](#) Published January 1, 2014. Volume 133, Issue 1. Pages 3-13. © 2013.

Fig 1 Airway inflammation in the setting of asthma. The orange box represents activities in the lymph node. The dendritic cell (DC) processes antigens, migrates to the lymph nodes, and associates with TH 0, which then differentiates and migrates back to the airway. A, Noneosinophilic/neutrophilic asthma, B, Eosinophilic asthma. Remodeling occurs in patients with all forms of asthma but is only shown in Fig 1. B, EPO, Eosinophil peroxidase; ICAM-1, intercellular adhesion molecule 1; LTB 4, leukotriene B4; MΦ, macrophage; MBP, major basic protein; MMP, matrix metalloproteinase; PAF, platelet-activating factor; Treg, regulatory T cell; TSLP, thymic stromal lymphopoietin.

**Asthma in Children**

Disease Overview 

Conn's Current Therapy 2016 - Bope, Edward T., MD; Kellerman, Rick...

**Epidemiology**

Asthma prevalence in the United States has been on the rise since the 1990s. It is currently estimated that 9.6% of children younger than 18 years (7.1 million children) carry the diagnosis of asthma. Male sex, African American or Puerto Rican ethnicity, and lower socioeconomic status are associated with an increased risk of developing asthma. Prevalence estimates for these groups are as high as 11% to 16%.

Asthma has a significant impact on both school attendance and health care expenditures. According to the National Health Statistic Report in 2007, children made 640,000 emergency department visits and were hospitalized 157,000 times as a result of asthma. In 2008 it was estimated that there were 10.5 million missed school days, and about 5% of children reported long-term limitations on their usual activities due to asthma symptoms.

اگر خواهان اطلاعاتی در مورد پروسه جراحی باشیم می توانیم از قسمت procedures consult استفاده کنیم

# به عنوان مثال می خواهیم در مورد جراحی Thyroid gland اطلاعاتی به دست آوریم

The screenshot shows the ClinicalKey website interface. The search bar at the top contains the query 'Thyroid gland'. Below the search bar, the results are displayed under the heading 'Procedures' with a dropdown menu showing 'Thyroid gland' selected. There are filters for 'Source Type' and 'Specialties', and a 'Procedure...' button. The results are sorted by relevance. Each result is a link to a 'PROCEDURES CONSULT' page, with a checkbox to the left of the title. The first result is 'Partial Thyroidectomy (General Surgery)' by John A. Olson, published on May 30, 2009. The second result is 'Parathyroidectomy (General Surgery)' by John A. Olson, published on June 15, 2009. The third result is 'Radial Artery Access for Coronary Angiography (Cardiology)' by Catherine M. Otto, published on December 31, 2013. The fourth result is 'Cervical Arthrodesis (Orthopedics)' by S. Terry Canale, published on September 21, 2007. The fifth result is 'Fine Needle Breast Aspiration (General Surgery)' by Michael L. Tuggy, published on August 18, 2008. The sixth result is 'Fine-Needle Aspiration—Breast (Family Medicine)' by Michael L. Tuggy, published on August 18, 2008. The right side of the page includes a 'Help & Feedback' button.

# Guidelines راهنمایی بالینی

برای پیدا کردن راهنمایی‌های بالینی از قسمت Guidelines استفاده می‌کنیم. به عنوان مثال یک راهنما در مورد نحوه رفتار با بیمار مبتلا به پارکینسون می‌خواهیم

The screenshot shows a computer browser displaying the ClinicalKey website. The URL in the address bar is [https://www.clinicalkey.com/#/content/nice\\_guidelines/65-s2.0](https://www.clinicalkey.com/#/content/nice_guidelines/65-s2.0). The page title is "Parkinson's disease in over ...". The ClinicalKey logo is at the top left, and the navigation bar includes "Guidelines" (which is highlighted with a red oval and arrow), "Parkinson disease", "Back to results", "Books", "Journals", and "More". The main content area is titled "GUIDELINE" and shows "Parkinson's disease in over 20s: diagnosis and management (CG35)" from the "National Institute for Health and Care Excellence (NICE)". The left sidebar lists various sections of the guideline, including "Introduction", "Patient-centred care", "Key priorities for implementation", and numbered sections from 1 to 7, as well as appendices A through D. The "Introduction" section is expanded, providing a brief overview of Parkinson's disease and its symptoms. The "Health and resource implications" section is also visible at the bottom.

# کار آزمایی بالینی Clinical trials

کار آزمایی بالینی یک مطالعه پزشکی به منظور ارزشیابی و مشاهده اثر یک مورد معین در سلامت فرد می باشد. ثبت کارآزمایی بالینی منجر به جلوگیری از انجام مطالعات تکراری می شود.

Pancreatic Cancer

Disease Overview [View Full Topic](#)

Goldman-Cecil Medicine · Goldman, Lee, MD; Schafer, Andrew I., MD

◆ Definition

Pancreatic cancer usually refers to ductal adenocarcinomas of the pancreas, because more than 90% of pancreatic tumors arise from the ductal epithelium. Other major tumors of the pancreas include endocrine malignancies ( [Chapter 195](#) ), carcinoid tumors ( [Chapter 232](#) ), lymphomas ( [Chapter 185](#) ), and a variety of rare sarcomas.

◆ Epidemiology

Pancreatic ductal adenocarcinoma (PDAC) has one of the highest incidence-to-mortality ratios of any disease. Although it represents the tenth leading cause of cancer in the United States, it is the fourth leading cause of cancer-related deaths,<sup>1</sup> because the vast majority of patients will die from their disease. Annually, approximately 40,000 individuals will die in the United States from PDAC or its complications. The

# Safety Study of Nivolumab With Nab-Paclitaxel Plus or Minus Gemcitabine in Pancreatic Cancer, Nab-Paclitaxel / Carboplatin in Stage IIIB/IV Non-Small Cell Lung Cancer or Nab-Paclitaxel in Recurrent Metastatic Breast Cancer

First received on December 3, 2014. Last updated on March 30, 2016.

## Purpose

The purpose of this study is to assess safety of nab-paclitaxel based chemotherapy regimens administered prior to and/or in combination with nivolumab in Pancreatic Cancer, Non Small Cell Lung Cancer (NSCLC) and Metastatic Breast Cancer (mBC).

Status	Recruiting
Condition	Breast Neoplasms
Phase	Phase 1
